

How to clean Apple EarPods

Clean your EarPods by removing dust and earwax

Written By: jimenezser

INTRODUCTION

This guide will teach you how to clean your EarPods

TOOLS:

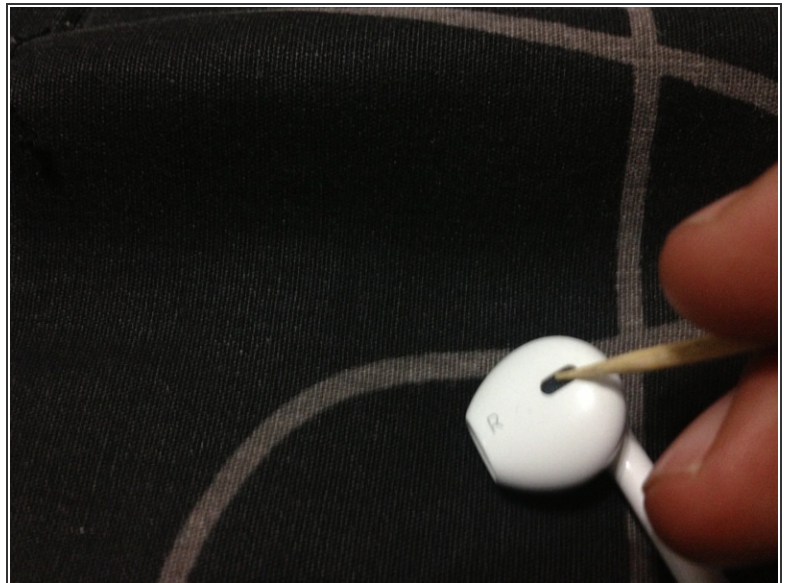

- [Toothpick](#) (1)
 - [High Content Rubbing Alcohol](#) (1)
-

Step 1 — Apple EarPods cleaning

- If your EarPods are dirty with dust or wax, or anything else on the ear pieces, follow these steps to clean them.

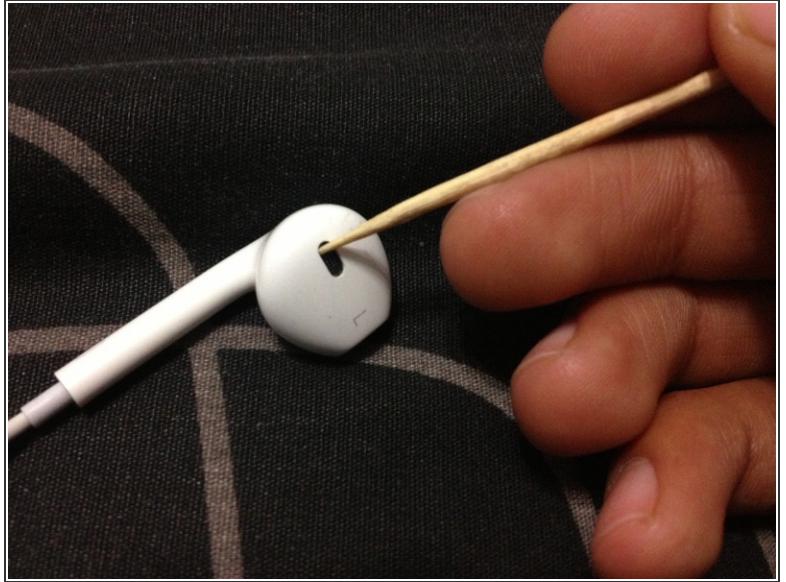

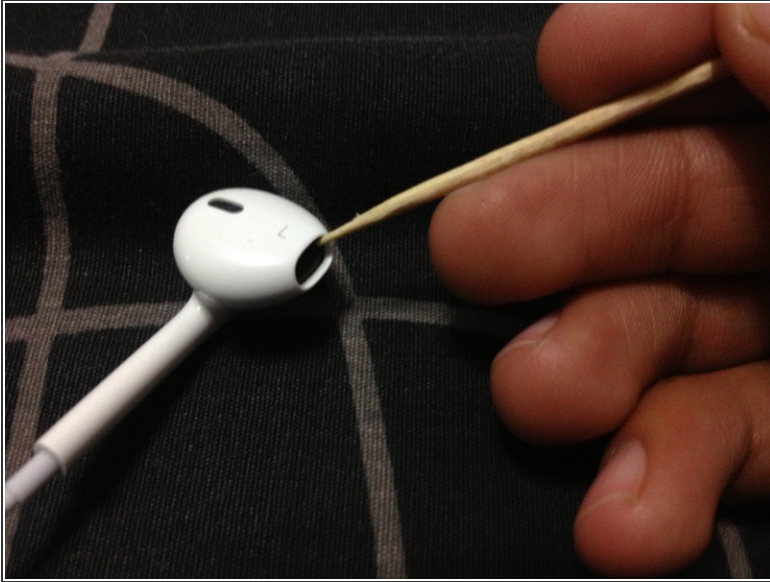

Step 2

- Use a toothpick to rub all the holes in the earphone

⚠ Don't use a pencil, it lets waste or any other metal tool, you can puncture the earpod and ruin it.

Step 3

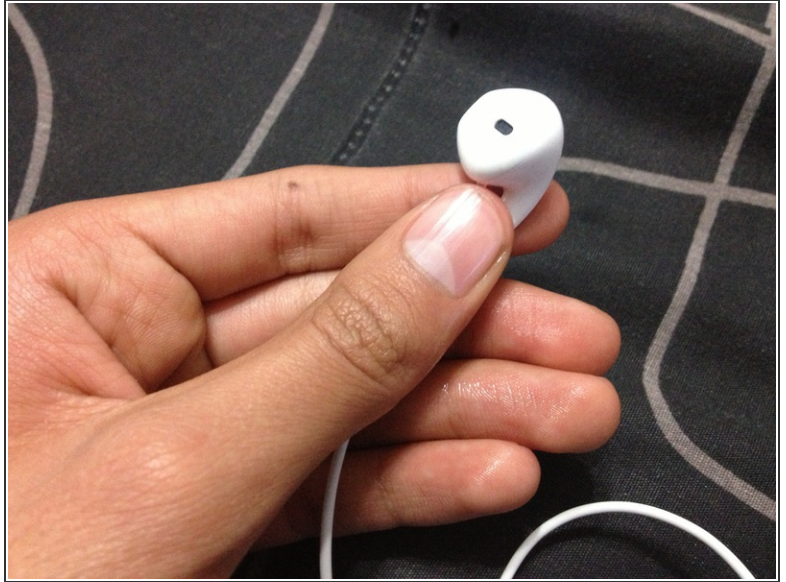

- Repeat the process for the other EarPod

Step 4

- Use isopropyl alcohol (rubbing alcohol) to clean the exterior of the EarPod
- ❗ Ignore the fact that the alcohol is in the Earpods' case

Step 5

- Don't submerge the EarPods in the alcohol. If the alcohol enters the interior of the Earpod, it will damage the speaker.

Step 6

- Let the EarPods dry for at least 10 minutes before using
- ⚠ Let the Earpods dry by itself, if you use a fan, a hair dryer, or anything else, you could generate corrosion inside and that will ruin it

Remember to dry your Earpods for 10 minutes.
